

P1 Pro Max

FULL POWER

Intelligent Regulated Power Supply

Power meter function

Individual charging
waveform sampling

Unified regulation
of current and voltage

Double Pulse Powerful Spot Welding

Supports precision welding of electronic components, battery plate replacement, lithium battery nickel sheets, etc.; the first/second pulse duration can be customized

Short Circuit Detection And Repair

Solve the short-circuit fault repair of mobile phones and various electronic devices, quickly switch three-way voltage, and support free adjustment of current and voltage.

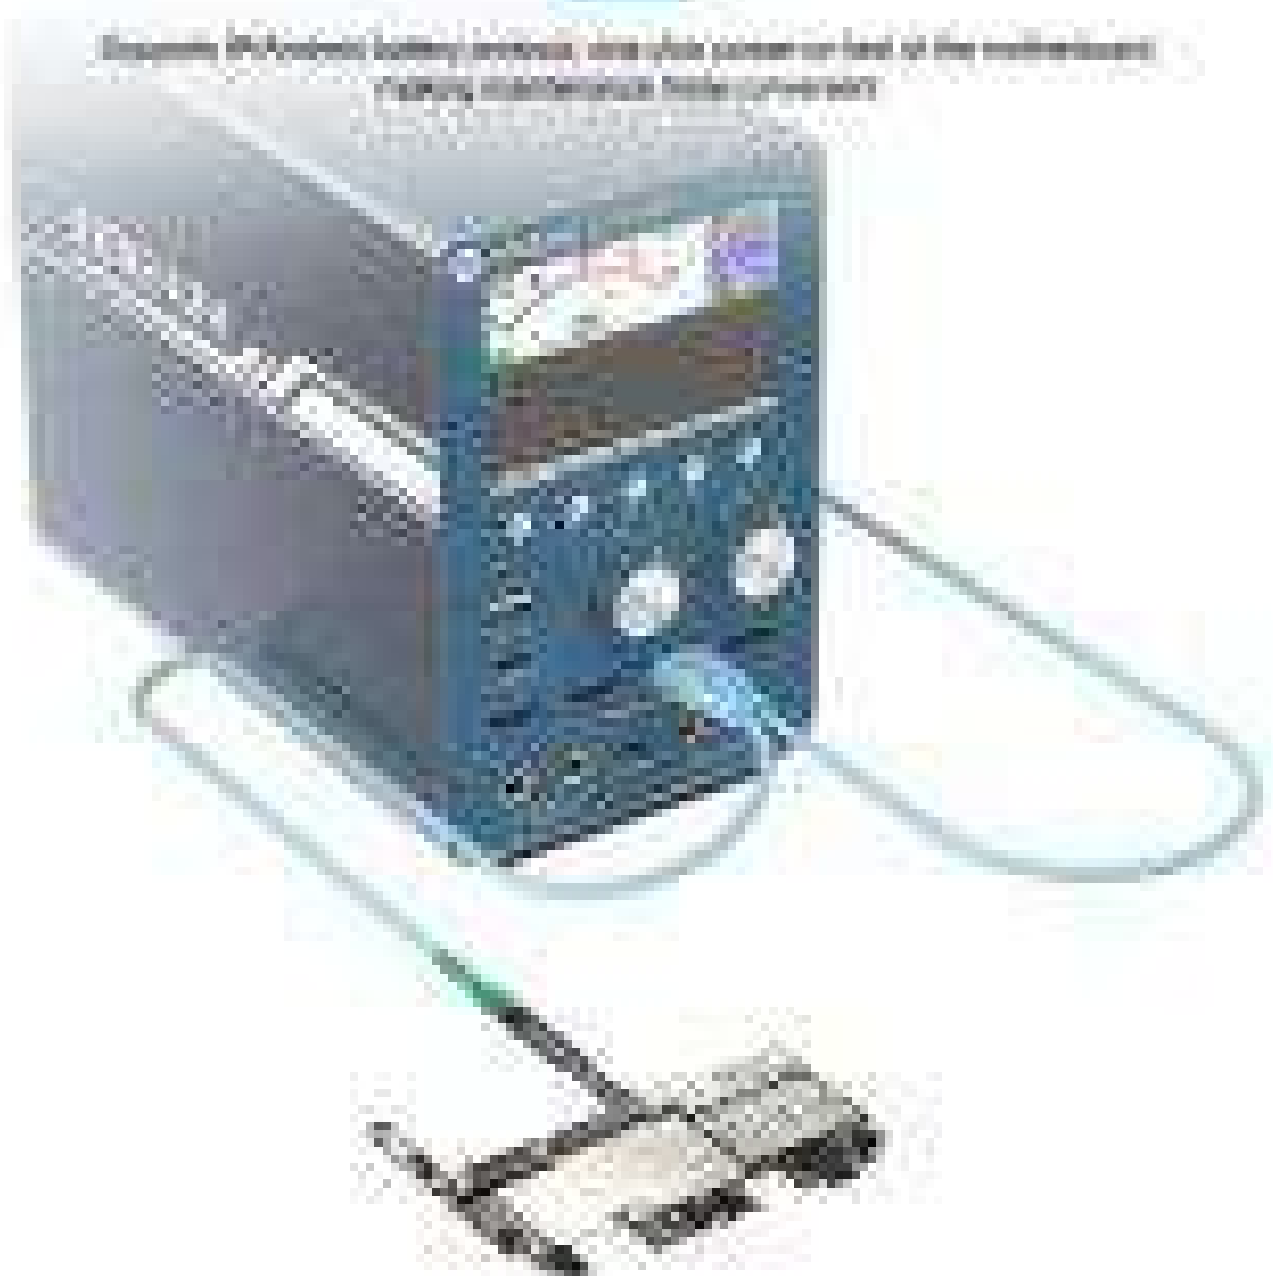

PD/QC Simultaneous Fast Charging

Supports PD/QC fast charging protocol, real-time detection of fast charging voltage and current, separate charging current waveform sampling, more powerful functions

One-click Startup And Convenient Maintenance

Supports 200 pages (using standard size) and also comes up fast at the millisecond!
Using intelligent maintenance!

DC Unified Output Waveform Display

The startup power supply is connected to the main power output, the current and voltage are adjusted uniformly, and the main power waveform interface switches between multiple ranges (1.2A/2.4A/4A/6A/12A)

Packaging box

SUNSHINE P1 Pro Max

Burn-in line

Spot welding line

Power cable

Manual
